CHEVROLET MOBILE WiFi CONNECTIVITY ACCESSORY

Now your Chevrolet can be a complete mobile hotspot. Available on the 2014/2015 Silverado HD, all-new Silverado, Tahoe, Suburban, Traverse and Express models, this new accessory allows for connection to any wireless device, providing access to sites right from your vehicle. Connect up to 5 devices, up to 50 feet around the vehicle, at up to 3G broadband speed. Parental Controls and Fleet Management Apps services and pricing provided by Autonet Mobile.

PARENTAL CONTROLS APPS

Parental Controls let parents assign rules and guidelines to teen drivers and their vehicles. Through notifications sent to a mobile device, parents can remotely supervise teens as they travel. Additional fees required.

Features of Parental Controls include:

- Car Finder — maps the vehicle’s location at any time, even if it is stolen or lost.
- Curfew Alerts — lets parents receive alerts when vehicle curfews are broken. Turn on “Grounded” mode when the teen’s driving privileges have been revoked.
- Speed Tracker — sends alerts when specific speed caps are broken.
- Routine Check-Ins — receive notification when the vehicle is inside or outside specific zones during set times, such as school or work, along with route check-in alerts.
- Geo Zones — set geographic boundaries the vehicle can be driven within. Sends parents alerts when the vehicle is driven out of the boundaries.

FLEET MANAGEMENT APPS

A Commercial Fleet platform app is ready to be downloaded immediately with these features (additional fees required):

- Location Tracking
- Driver Diagnostics
- Asset Management

- Part Number: 22871071 (The Express Part Number is 23135079)

*Subscription rates are subject to change. Coverage is limited to continental United States, Alaska and Hawaii.
CHEVROLET MOBILE WiFi FAQs

HOW DO I ACTIVATE THE ROUTER AFTER INSTALLATION?
To activate the router, a service agreement must be completed online at https://signup.autonetmobile.com. (Note: The serial number of the router is required, which can be found on the activation card, the router, or the router’s packaging.) After the registration is complete, the router must be added to the user’s account. Once this is done, the 12-month included service can be added to the router by shopping for services. When the terms and conditions are accepted, the 12 months of 50MB/month service begins.

HOW DO I CONNECT A WIRELESS-ENABLED DEVICE TO THE ROUTER?
Search for a network on your wireless device and connect to a wireless network that contains the name Autonet (e.g. Autonet-1234). After a connection to the router has been established, you can access the Internet from your wireless device.

HOW CAN SECURITY BE SET UP TO ENSURE ONLY SELECTED WIRELESS DEVICES CAN ACCESS THE INTERNET CONNECTION?
After initially connecting the wireless router, security can be created by accessing the link www.autonetrouter.com/admin. Log on (default user name is “autonet,” the password is the unit’s serial number) and select Wireless Security. On this screen you can either set up a WEP or WPA key that will be required for any device that attaches to the wireless network.

WILL THE CHEVROLET MOBILE WiFi MODULE WORK IN MY AREA?
The Mobile WiFi module runs over the largest nationwide 3G network and is available in most locations in the United States. It does not work in other countries such as Canada and Mexico. Please visit http://autonetmobile.com/solutions/ and click the coverage locator link to view a full coverage map.

WHAT KIND OF INTERNET SPEED CAN BE EXPECTED?
Over the 3G network, download speeds average from 300kbps–1000kbps; upload ranges from 128kbps–300kbps. When not on 3G, the average download is 40kbps–200kbps, and 25kbps–100kbps for upload. The more devices connected to the router, the slower the speed will be.

HOW MANY DEVICES CAN BE CONNECTED TO THE CHEVROLET MOBILE WiFi MODULE?
Up to 5 devices can be connected to the router; however, the fewer the number of connected devices, the faster the wireless Internet speed will be.

HOW MUCH IS THE MONTHLY FEE AFTER THE 12 MONTHS OF INCLUDED 50MB/MONTH?
Monthly subscriptions provided by Autonet Mobile start at $19.95 for a 1GB plan and $59.00 for a 5GB plan. The plan can be paid either on a monthly or annual basis. A one-year service agreement is required with Autonet after the initial 12-month period should the customer desire to continue the service. To sign up for the service and see full details, please visit https://signup.autonetmobile.com.

CAN THE CONTRACT BE CANCELLED?
The contract can be cancelled at any point; however, if the service subscription is cancelled, the customer is responsible for 50 percent of the outstanding balance, based on a 12-month contract.

CAN I MONITOR HOW MUCH DATA IS USED ON A MONTHLY BASIS?
Customers can monitor their usage online, and set up thresholds where they would receive a notification if they are close to the monthly limit. After the initial registration, the customer can log on to http://my.autonetmobile.net/ for monitoring.

WILL THE ROUTER STOP WORKING IF THE LIMIT HAS BEEN EXCEEDED?
The router will not stop working but the connection speed will be gradually decreased.

WHERE CAN THE INSTALLATION INSTRUCTIONS BE FOUND?
Instructions for installation of this part are available through GM Service Information (SI) within the “Accessories Manual” section specific to the vehicle for which you purchased the accessory.

Should you experience any issues with the Chevrolet Mobile WiFi module, please contact the Autonet Mobile customer service team at 1–800–977–2107. More information can also be found at www.support.autonetmobile.com.
